

Assoc. Prof.

Barış BAYRAKLI

(Aquaculture Engineer / Vice President
of the Association)

He has a bachelor's degree from the Faculty of Fisheries at Sinop University. He did his master's in Aquaculture and his PhD in Fisheries and Processing. He is still doing scientific research as an Associate Professor at Sinop University. Within the scope of researches, he specialized in fish biology, feed losses in

net cages, fishmeal and oil processing standards. He also conducted studies on human health risk analysis that may occur as a result of consuming heavy metals in sea creatures. He carried out many national scientific research projects and took part in EU projects. He believes in the contribution of Non-Governmental Organizations in cultural development. In this context, he took active roles in many NGOs.
