

Lect.

Ömer Salih ASLAN

(Diver / Member of the Association)

He started diving to become like marine explorer Jacques Cousteau in 1994 and graduated in underwater technology in 2001. As a commercial diver, he worked in international projects in the fields of Istanbul Eurasia tunnel and tube crossing, deep discharge pipelines, deep optical cable lines, oil platforms, port constructions and ancient underwater Archeology, and worked as a manager in marine projects in Turkey and the entire Middle East. He took part in marine environmental protection projects. He is an expert and commercial diver instructor in the field of search and rescue, wreck removal, trimix diving, underwater photography, deep diving underwater structures construction. He continues his career academically by educating students in the underwater technology program of Sinop University. He contributes to the activities under the umbrella of BSEMAR in order to better express his passion for the submarine world. Since man seeks naturalness everywhere, he gives importance to seabed restorations.
