

Assoc. Prof.

Zafer KARSLI

(Aquaculture Engineer / Member of the
Association)

He has been an active member of the Black Sea Environmental and Marine Research Association since its establishment. He took part in many national and international projects. He has a bachelor's degree in fisheries and a master's and doctorate degrees in aquaculture. He has been working as a lecturer in the underwater technology program since 2013. It supports trainings and studies on the protection of the

ecological balance and ecosystem in the seas. He has the knowledge, ability and equipment to take part in scientific research in the fields of fish biology and physiology, the use of underwater photography and video systems, underwater tourism, first aid and lifesaving in water, survival techniques and maritime basics. He supports clean environment and clean sea activities by regularly participating in the projects and activities of non-governmental and educational organizations such as foundations and associations. He also aims to contribute to the activities of the association by being a member of the Black Sea Environment and Marine Research Association (BSEMAR), which he believes in its activities, by supporting new initiatives and projects. In this direction, he has focused on protecting the ecosystem of the Black Sea basin, ensuring its sustainability, providing necessary training and creating awareness.
